

Belaire Range of Mobile Air-Conditioners

H3600V -Inverter Technology

Introduction:

The Houghton Belaire H3600V has industry leading power and efficiency thanks to inverter technology. Excellent performance with generator and battery/inverter power systems. True 'Soft start' performance.

Features:

1. Digital Inverter Control eliminates inrush current spikes on start up.
2. Innovative high efficiency and low noise air duct system ensures higher air flow at a lower noise level.
3. Integrated ECO mode with two different power input level allows operations at 70% and 40% power demand to stretch your battery life even further. Assist with operation on smaller generators or heavily loaded power supplies.
4. 4-way outlet from the interior unit allows air flow to be directed all throughout the living spaces.
5. 4 fan speeds to choose from Turbo for powerful heating or cooling, low for Quiet night-time use.
6. Excellent reverse cycle performance allows the unit to operate in temperatures as low as -5°C and as high as $+50^{\circ}\text{C}$.

Specification:

Power supply	1PH/220~240V/50Hz	Maximum input power	1700W
Cooling capacity	3600W (12,276 BTU)	Maximum current	7.4 A
Heating capacity	3300W	Weight of Indoor Unit	3.4 kg
Power input cooling	1450W	Weight of Outdoor Unit	38.5 kg
Power input heating	1400W	Installed weight	38.5+3.4 (kg)
Current cooling	6.4 A	Current heating	6.2 A
Installation opening (mm)	360 x 360 (Optional adapter required for 400 x400)	Outdoor unit dimension H x W x L (mm)	223 x 850 x 1122
		Plenum unit dimension H x W x L (mm)	49 x 556 x 575
