

BOAT STABILIZER

ANTI ROLLING GYRO

The Mitsubishi Anti Rolling Gyro Rules the Waves with over a decade of experience creating stable situations for pleasure craft.

Not only does the ARG reduce roll at zero speed but at trolling speeds as well.

ARG175T (MSM-17500T-A1)

The ARG 175T (MSM-17500T-A1) is the newest addition to the Mitsubishi line of gyros.

With decidedly more Anti-Rolling torque in a smaller package, the 175T is certain to become a leader in the under 25 ton vessel range. (Depending on GM of the boat)

Don't settle for 2nd best for you and your family's comfort.

Specifications

| | |
|----------------------------------|--|
| Anti-Rolling Torque at Rated RPM | 17,500Nm MAX |
| Rated RPM | 4,600rpm |
| Angular Momentum at Rated RPM | 3,500Nms |
| Spool-up Time to Rated RPM | 35 minutes |
| Spool-up Power AC Motor | Single phase 4.3KW / Three phase 4.0KW |
| Operating Power AC Motor | Single phase 3.5KW / Three phase 3.0KW |
| AC Input Voltage | Single phase 220-240V, 50/60 Hz / Three phase 200-240V, 50/60 Hz |
| Weight | 380Kg (838Lbs) |

Envelope Dimensions

| | |
|-------------------------|--|
| Gyro | 630 length 950 wide 620 deep --mm / 24.8 length 37.4 wide 24.4 deep --inch |
| Motor Driver (Inverter) | 400 high 350 wide 187 deep --mm / 15.7 high 13.8 wide 7.3 deep --inch |
