

Belaire Range of Mobile Air-Conditioners

H2400D

Introduction:

The Belaire H2400D is a ducted under-bench type air conditioner that can be custom installed within your motorhomes, caravans and boats. It is an ideal choice for providing local spot cooling when you're on the move.

Features:

1. A light weight design that is ideal for small caravans, camper trailers and boats.
2. Easy to install and suitable for most conditions with excellent performance in both cooling and heating modes.
3. The unit can be installed in a variety of locations inside a caravan, motorhome and boats including in closets, under benches or bunks and in cabinets. It has under floor vents and three duct outlets to direct the airflow and ensure comfort throughout the cabin.
4. 2.4 kW of cooling and 2.0 kW of heating in reverse-cycle mode.
5. A full-function built-in control panel and a remote control are available for your convenience.
7. Both the built-in control panel and remote control combines cooling, heating, sleep, fan speed, and dehumidifying functions.
7. High efficiency three speed and low noise fan.
8. Featuring flexible and extendable air ducts.
9. Patented air duct design for safety and reliability.
10. Toughest in its class-designed and tested for harsh conditions. Excellent reverse cycle performance allows the H2400D to operate in temperatures as low as -5°C and up to +50°C.

Specification:

Power supply	230-240VAC/50Hz	Maximum input power	1120W
Refrigerant charged	R407C/500g	Maximum current	4.9 A
Cooling capacity	2400W (8200 BTU)	Rated current for heating	4.1 A
Heating capacity	2000W	Rated current for cooling	4.3 A
Installed Weight	30 (kg)	Unit dimension H x W x L (mm)	287 x 442 x 652 (690mm including hold down brackets)
